COLDFRAME GREENHOUSES

The Gothic Coldframe is a long time favourite nursery over wintering or growing Greenhouse. The 20' Coldframe is an easy to assemble, low-cost growing structure. Designed to cope with condensation run-off, shed snow and withstand harsh conditions while remaining stable, the Coldframe is an ideal choice for a wide range of locations. The position of the side purlins accommodates quick and convenient side loading and unloading of stock.

Whether for long term use or for a temporary selling structure, the Paul Boers Gothic Coldframe is very versatile, practical, and affordable.
