OPEN ROOF

OPEN ROOF GREENHOUSES

The Open Roof greenhouse has the same structure as found in the traditional Venlo greenhouse but with a newly designed roof system. The roof provides full ventilation when opened, but still offers superior protections from the elements when closed. The roof hinges at the gutter and seals at the roof ridge. This design is eminently suitable for growers with crops such as bedding plants or nursery stock where hardening off of a crop is required.

For those plants that like the outdoors but need the protection of a greenhouse from time to time, the open roof greenhouse is the ideal solution.

COMPLETE TURN KEY

SIZES

- ▶ PEAKS OF 3.20M, 4.00M, 4.27M, & 4.80M
- ▶ UP TO 4.50M BETWEEN POST SPACING
- ▶ UNLIMITED HEIGHT RESTRICTIONS

FEATURES

- ▶ NATURAL CLIMATE ZONE ▶ HIGH LIGHT ▶ NATURAL VENTILATION

OPTIONS

- ▶ TWO OPTIONS AVAILABLE FOR VENTILATION; RACK & PINIONS OR THE PUSH/PULL BARS
- ▶ WITH RACK & PINION BOTH SIDES OPEN SIMULTANEOUSLY – DRIVE
- ▶ SHAFT IS MOUNTED IN THE PEAK WHERE THE PINION HOUSING IS ATTACHED
